Primary Examiner, Art Unit 1616

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/31/2009 has been entered.

Applicant's 1/22/2010 response to Inquiry under 37 CFR 1.105 has been reviewed. Applicant states, in effect, that document no. 76 in the IDS of 7/23/2009 is in error. Applicant states that the "Experimental Results" disclosure by Lin et al. was not actually disclosed in the Dermatology Proceedings document (cover sheet/page provided by applicant in the same IDS) or Third Asian Pacific Congress on Antisepsis. The Dermatology Proceedings cover sheet/page appears to have been erroneously attached to said Lin et al. disclosure in another copending patent application, from which applicant's paralegal obtained document no. 76 for this application. Applicant states, "[W]e believe the Lin report was composed in 2000 at the request of the present assignee," "the article by Lin did not appear in this journal," and "Applicant is at a loss to explain why the PTO copy of this document included this cover sheet." In view thereof, the Examiner finds evidence sufficient to determine document no. 76 in the IDS of 7/23/2009 to be in error. Based on the available evidence before this Examiner, said document, with its 1997 disclosure date, did not actually disclose the "Experimental Results" article by Lin et al.

The terminal disclaimer filed on 4/22/2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,583,176 has been reviewed and is accepted. The terminal disclaimer has been recorded. It is noted that another terminal disclaimer is of record, which disclaims the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,197,814.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Murashige on 4/20/2010.

Amendments to the Claims

Claim 30. (Currently amended) An aqueous solution comprising greater than 5% wt/vol citric acid, a disinfectant amount of a complex having the formula Ag^+CA^- , wherein CA^- is the citric acid anion, $\text{C}_6\text{H}_7\text{O}_7^-$, and an alcohol, a detergent or a mixture thereof

Claim 58. (Currently amended) The aqueous solution of claim 30, which contains an alcohol.

Claim 59. (Currently amended) The aqueous solution of claim 58, wherein the alcohol is ethanol.

Claim 60. (Currently amended) The aqueous solution of claim 30, which contains a detergent.

Claim 61. (Currently amended) The aqueous solution of claim 60, wherein the detergent is sodium dodecyl sulfate.

Claim 62. (Currently amended) The aqueous solution of claim 30, which contains both a detergent and an alcohol.

Amendments to the Specification

Page 2, delete lines 2-5.

In applicant's Preliminary Amendment of 6/19/2003, which amended the specification by inserting before the first line new related application data (**Item 11** of "REQUEST FORM FOR FILING A DIVISIONAL UTILITY APPLICATION UNDER 37 CFR 1.63(d)"), **at line 2 of said Item 11**, after "2001," **insert** - - - now U.S. Patent No. 6,583,176 - - -.

The following is an examiner's statement of reasons for allowance: Long and extensive prosecution of this application shows numerous issues that have been overcome through various amendments and evidentiary filings. Current claims, which are reflective of amendments made since the Final Office action of 4/1/2008, overcome all outstanding rejections and the prior art of record. It has been determined that claims

of U.S. Patent 6,838,095 do not present an issue of Interference with respect to the current claims, as amended herein. All claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
